RISK WARNING

Trading contracts-for-difference on margin carries a high level of risk, and may not be suitable for all investors. The high degree of leverage can work against you as well as for you. Before deciding to trade contracts-for-difference you should carefully consider your investment objectives, level of experience, and risk appetite. The possibility exists that you could sustain a loss of some or all of your initial investment and therefore you should not invest money that you cannot afford to lose. You should be aware of all the risks associated with contracts-for-difference trading and seek advice from an independent financial advisor if you have any doubts. Any transaction you enter with fxtradingsupport Group, or any other trading Company under the Brand name of fxtradingsupport Group (collectively referred to hereinafter as "fxtradingsupport Group Affiliated Companies") do not concern or involve in any shape or manner fxtradingsupport Group which is merely a marketing arm of the fxtradingsupport Group Affiliated Trading Companies. HIGH RISK INVESTMENT WARNING

Trading contracts-for-difference on margin carries a high level of risk, and may not be suitable for all investors. The possibility exists that you could sustain a loss in excess of your deposited funds. Please refer to specific risk warning for each regulated entity during the account opening process.

The high degree of 'gearing' or 'leverage' is a particular feature of this type of transaction. This means that a relatively small movement in the price of your investment may have a significant negative effect on your capital and lead to large losses. You should familiarize yourself with the concept of margin trading and ensure you do not over expose yourself.

You may be required to deposit substantial additional margin, at short notice, to hold your positions. If you fail to provide funds to hold your positions, they may be closed without further reference to you. If your account ends up at a loss you will be 15% of the money you paid as per our business rules.

Such transactions will not be undertaken on a recognised or designated investment exchange and, accordingly, they may expose you to greater risks than exchange transactions. You will be entering into transactions as "principal" with fxtradingsupport Group. Prior to placing any trades, you should ensure you are aware of all costs that will be incurred by you.

You will be provided with access to an internet trading platform and there are risks associated with utilising such an Internet-based deal execution trading system including, but not limited to, the failure of hardware, software, and Internet connection. Since we do not control signal power, its reception or routing via Internet, configuration of your equipment or reliability of its connection, we cannot be responsible for communication failures, distortions or delays when trading via the Internet.

We cannot disclose all of the risks to you and you should ensure that contracts-for-difference and other derivative products are suitable for your investment needs.

It is possible that you can lose all of the money you deposit, and in some circumstances, you may even be required to deposit additional sums to cover your losses. By undertaking these types of high risk trades you acknowledge that you are trading with your available risk capital and any losses you may incur will not adversely affect your lifestyle

Trading on any foreign currency exchange, trading cryptocurrency or OTC penny stocks is extremely volatile, carries a high level of risk and is not suitable for everyone. This risk is increased by using margin as leverage, which is dangerous and can work against You. Before deciding to invest or trade in foreign currency, cryptocurrency, OTC penny stocks or in any other market, You should carefully consider your investment goals, level of experience, and risk tolerance. It is EXTREMELY LIKELY that You will sustain losses of some or all of your initial capital and therefore You should not invest money that You cannot afford to lose. The value of any given trade/investment You elect to make on any foreign currency exchange market, with any specific cryptocurrency and/or with any OTC penny stock is subject to extremely high volatility that can result in significant percentage losses, or the complete loss, of the capital You contribute.
